

## **Native Names**

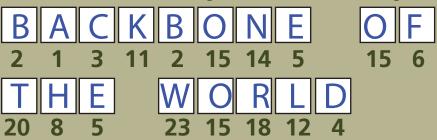

#### **Directions:**

Native American place names often describe the natural processes or characteristics of a place. The Salish, Pend d'Oreille, Kootenai, and Blackfeet peoples have had a presence in and around Glacier National Park for thousands of years. The Salish and Pend d'Oreille name for the Rocky Mountains is Xwcxwcut. Use the code breaker below to find out what the Blackfeet and Kootenai names mean.

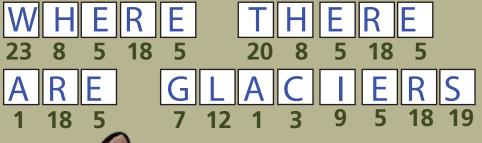

**Code Breaker** 

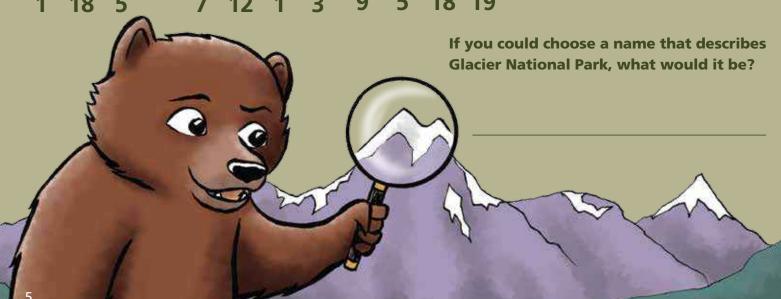

The Blackfeet name for this region is "Mistakiks," meaning:

The Kootenai name for the Glacier region is "Ya-qawiswitxu'ki," meaning:

## **Native Names**

After European settlers arrived, places were often renamed for the newcomers who lived and worked here. Today, places with English translations of native names like Running Eagle, Dancing Place, Belly River, Chief Mountain, Two Medicine, and Rising Wolf tell the stories of the people who lived here and how these lands were used.

## **Directions:**

Fill in the blank in each sentence with the English translation from the words highlighted above, and find the names in the word search. Words can be forward, backward, diagonal or upside down.

- Bison (buffalo) were important to the Indian tribes. BELLY RIVER is from the Blackfeet name referring to the digestive system of the buffalo.
- A medicine lodge was erected on each side of a creek in honor of the Blackfeet Sun Dance. This valley is known as TWO MEDICINE
- A waterfall that flows from Two Medicine Lakes through a cave is called RUNNING EAGLE Falls. For the Blackfeet Nation, it is the place where warrior woman, Pitamakan, came for repeated spiritual guidance. S
- RISING WOLF , a mountain in Two Medicine, is a translation from the Blackfeet name meaning "the way the wolf gets up."
- DANCING PLACE is what the Kootenai Indians call the Lake McDonald area because it was a good place to dance.
- **CHIEF MOUNTAIN** is the name for the lone mountain in the northeast corner of the park. Even today, many tribes regard this as a holy place. All visitors need to be respectful of this area.

## **Habitats Are Homes**

There are four major habitats in the park: ALPINE, FOREST, AQUATIC and GRASSLAND. You can see all four of these habitats as you drive through the park. To protect wildlife, it is important to also protect their habitat.

All living things need food, water, shelter, and space to survive in their habitat. If one of these is missing, animals have a harder time living in that place.

# **Up, Up and Away?**

Rising temperatures and longer summers mean big changes for planet Earth. As the climate warms, some species must migrate north, or move higher up the mountains to find a cold habitat like the one they are used to. Species that can't move must adapt to the new climate. Scientists have predicted that some species may not be able to adapt or migrate and may not survive.

#### **Directions:**

Imagine that you are a snowshoe hare, a mountain goat, or a bull

trout in Glacier National Park. Write a paragraph about how your life might be different as summers become longer and hotter. Other effects of climate change include warmer water, snow melting earlier in spring, and smaller glaciers.

"The air temperature is nice and cool this summer. If it was much warmer, I would be too hot and uncomfortable in my thick coat!"

"This mountain stream is a cool 50° F this summer. If the water was hotter, I would not be able to survive!"

(an open ended response)

"Good thing my coat turned brown again this summer. If my coat was still white, predators would be able to spot me easily!"

## **Animal Adaptations:**

- Snowshoe hares use camouflage to hide from predators. They are rusty brown in summer and white in winter. In spring, it takes about ten weeks to make a complete color change from white to brown.
- Bull trout grow best when the water temperature is 48-57° F. They thrive in streams kept cool all summer by melting snowfields and glaciers.
- Mountain goats have a thick coat that allows them to survive cold winter temperatures. They shed in spring and a new coat begins to grow in July.

# **Moving Through Glacier's History**

The first Americans who lived in this great land, Traveled through the mountains in tribal bands, They could not avoid the heat or the sleet, The only way to travel was on their two

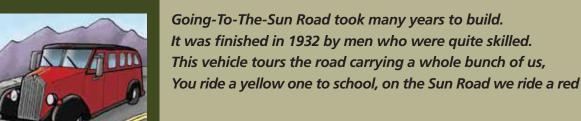

Hundreds of years ago the Spanish brought it by boat, With four legs and a tail, it's not a deer or a goat, You can ride it, but take heed, it moves with great force. So saddle up partner! You're riding a HORSE.

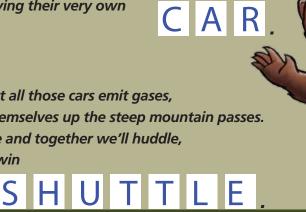

One rail at a time the Great Northern was erected. From St. Paul to Seattle, all was connected. Now it moves cars full of people, lumber, and grain. "All aboard!" There it goes, the conductor and the

Waterton-Glacier is a well-loved resource, People still visit by bus, train, and horse. Some come from close and others from afar, Many families arrive driving their very own

We understand now that all those cars emit gases, As everyone's driving themselves up the steep mountain passes. Now we can share a ride and together we'll huddle, 'Cause as a team we all win

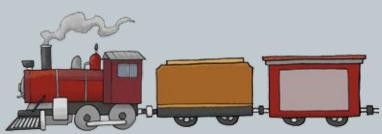

when we hop on the

#### **Directions:**

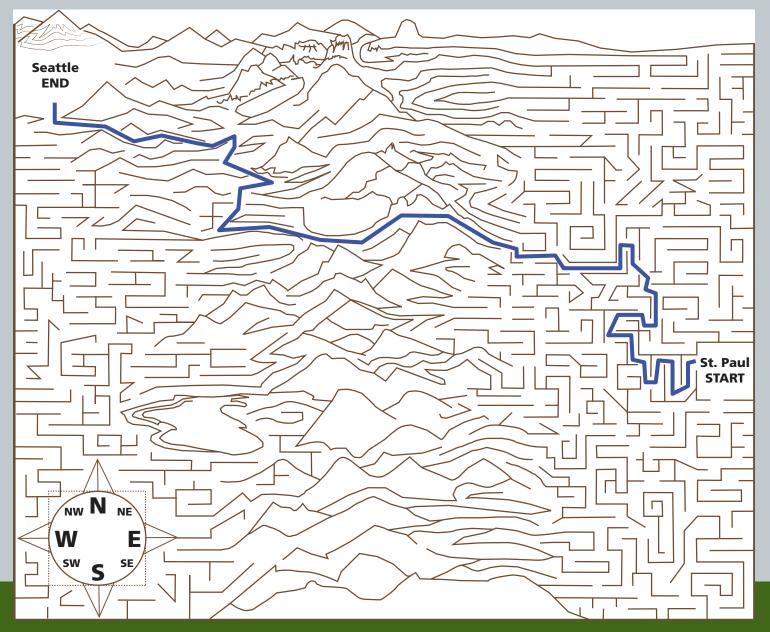

People have traveled through Glacier for a long time. To see how they moved, look at the pictures and complete the rhymes.

## **See America First**

The Great Northern Railway changed the lives of many forever. The railroad used the saying "See America First" to convince the wealthy to spend their vacations exploring the American West instead of traveling to Europe. After Glacier National Park was

established, the railroad company built hotels, chalets, and trails so that visitors could explore the park. Some of these historic buildings are still used today. For newcomers wanting easy access to the West, the railroad was an improvement that allowed many of them to stay here. For the native peoples already living here, the railroad meant more changes to the lifestyle their grandparents had followed.

### **Directions:**

Find your way from east to west in the maze above.

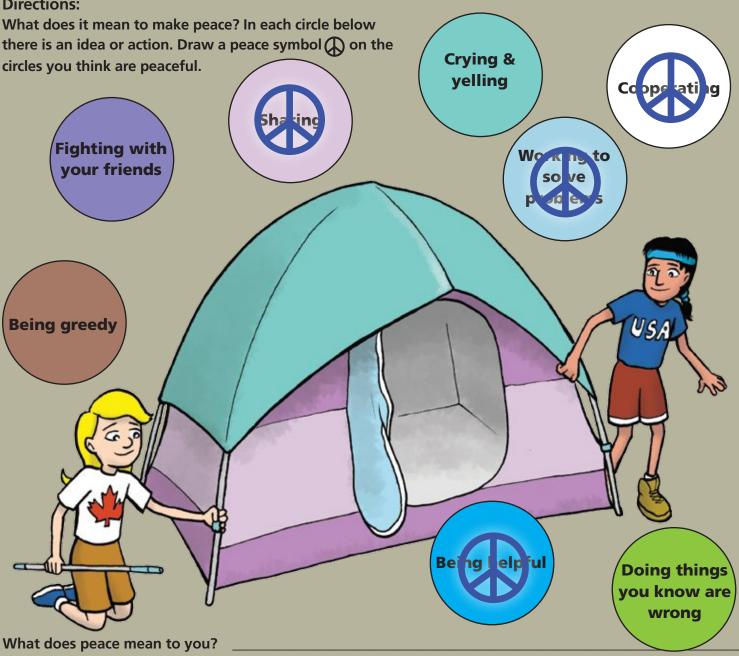

There is only one pass for the railroad to travel through the mountains so choose wisely!

# **Making Peace**

Waterton-Glacier became the first International Peace Park in the world in 1932. Rotary clubs in Alberta and Montana led the movement to join Glacier National Park and Waterton Lakes National Park into an International Peace Park that symbolizes the longtime friendship between Canada and the United States.

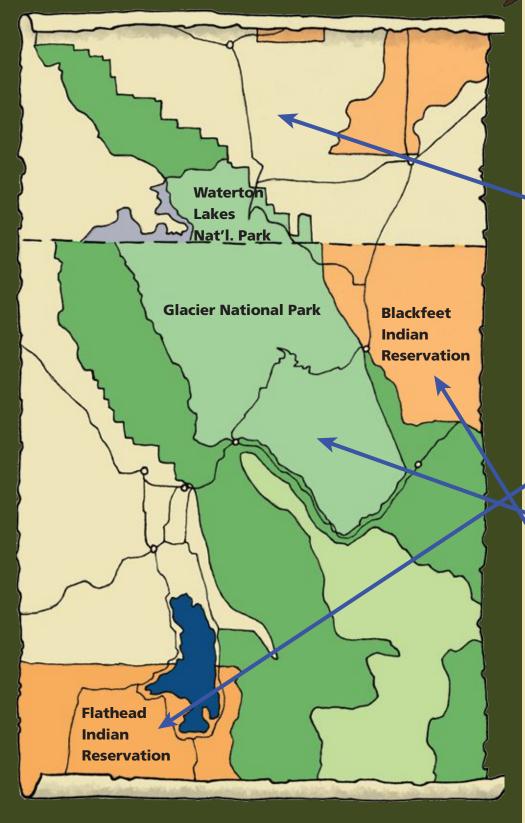

#### **Directions:**

# **Four Nations Working Together**

The water, plants, animals and history of Glacier National Park are shared by peoples of four nations: the **United States**, the **Flathead Nation**, the **Blackfeet Nation**, and **Canada**. The nations work together to protect their history in Glacier and these shared natural resources.

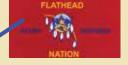

## **Directions:**

Label the flags below with the correct national name highlighted on the left. Draw a line to match each flag to the national park or reservation it represents.

Canada

**Flathead Nation** 

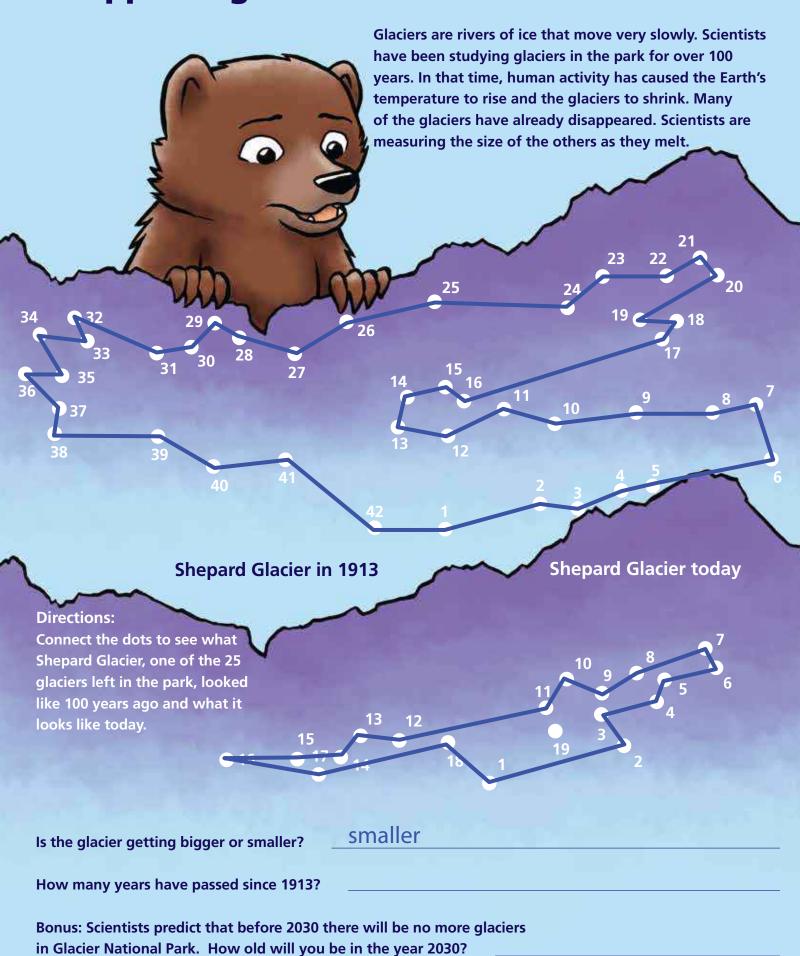

**United States** 

**Blackfeet Nation** 

## **Disappearing Glaciers**

## **Wise About Wildlife**

Glacier National Park is home to a lot of different kinds of animals. Many people come to national parks hoping to see wildlife, but it is important to remember that these animals are wild. They need plenty of space and a healthy habitat where they can find their own food. We need to be respectful of the animals and their needs while visiting the park. This is their home. We are the visitors.

# The state of the s

#### **Directions:**

Circle the highlighted words that best complete the following sentences.

If an animal changes its behavior because of your presence, you are too close I goofy looking / smelly.

In a national park it is never always / sometimes okay to feed human food to wild animals.

Bears look under rocks in hopes of finding potato chips (insects) peanuts to eat.

When you're hiking in bear country, you should hike quietly make noise wear perfume to warn bears that you are entering their space.

At night, park rangers care for the animals by putting them back into their cages / feeding them leaving them alone.

The place where an animal lives is called it (habitat) house / bachelor pad.
